Sequence Diagram (S1-S14):

- S1:** Private A / Private B / A.outside.com
- S2:** Private B / Private D / A.outside.com
- S3:** Global A / Global C / A.outside.com
- S4:** Global C / Global E / A.outside.com
- S5:** Global E / Global C / Global D
- S6:** REGISTRATION REQUEST (A)
- S7:** COMPLETION OF REGISTRATION (B)
- S8:** Global C / Global A / Private E
- S9:** Private D / Private B / Private E
- S10:** Private B / Private A / Private E
- S11:** Private A / Private E / XX / YY (D)
- S12:** Filtering operation
- S13:** Global A / Global D / XX / YY
- S14:** Private E / Private A / YY / XX

Network Diagram:

- OUTSIDE (The Internet):** Contains a DNS server (5) and a server (6) with address Global E. A domain name Global D (Private E) :Port YY is associated with the DNS server.
- ROUTER:** Connects the OUTSIDE to the ENTERPRISE A (Private).
- ENTERPRISE A (Private):** Contains an L2-SW (7) and an ADDRESS TRANSLATION/FILTERING DEVICE (3). The L2-SW is connected to a server (2) with address Private A :Port XX and another server (4) with address Private B. The ADDRESS TRANSLATION/FILTERING DEVICE is connected to a server (1) with address Global C (Private D).
